Re: Fort Wayne Reduction Site
Fort Wayne, Indiana

Dear Ms. Peaceman:

Enclosed is a November 15, 1989 Affidavit by Mr. Barry Pass with reference to the above site. As counsel for Mr. Pass' current employer, OmniSource Corporation, I am submitting this affidavit as a supplemental §104 response, and I anticipate additional affidavits, which will identify many more companies that disposed of hazardous wastes at the above-referenced site.

As discussed at the meeting I attended on August 28, 1989, with representatives of the U.S. EPA and the Fort Wayne Reduction Site Steering Committee, I am continuing to reduce to affidavit form certain information furnished to me by certain individuals who were formerly in the employ of Levin & Sons and/or National Recycling Corporation. This information simply identifies entities which generated and/or disposed of hazardous waste materials at this site. This process has taken more time than I originally anticipated, but I believe that the enclosed affidavit and the additional affidavit(s) which will be forwarded to you, and their quality, should facilitate EPA's resolution of this site proceeding; and I hope that you keep the Department of Justice informed of this as well. I continue to believe that cooperation, not litigation, is the preferred route, and I hope that our efforts are not in vain.

Ms. Karen Peaceman
November 21, 1989
Page 2

By copy of this letter, I am also today transmitting a copy of the enclosed affidavit to the Co-Chairs of the Fort Wayne Reduction Site Steering Committee. I will attempt to keep them advised of my progress in preparing the additional affidavits.

Sincerely,

BARRETT & McNAGNY

Robert S. Walters

AFFIDAVIT

November 15, 1989

Re: Generators to Fort Wayne Reduction Site

The undersigned, BARRY PASS, being first duly sworn upon his oath, deposes and says that:

A.

General Facts

1. I provide the following information, and execute this Affidavit on the basis of my personal knowledge and experience concerning the reclamation and landfill operations conducted at and upon the property presently referred to as the "Fort Wayne Reduction" site (the "Landfill") in Fort Wayne, Allen County, Indiana. This information also relates to the identity of and type of waste materials generated by certain companies and accounts with which I had personal contact.

2. During the period from the formation in 1966 of Fort Wayne Reduction, Inc. [the name of which was subsequently changed to National Recycling Corporation ("NRC")], through 1981, I was employed as the Executive Vice President of Levin & Sons, Inc. In this capacity, I had supervisory authority over the industrial and commercial waste hauling division, and had individual account responsibility for and/or job related contacts with the customers described herein. Specifically, I

served most of Levin & Sons' industrial customers and negotiated most of its contracts with its industrial customers. In 1981, Levin & Sons, Inc., sold its industrial and commercial waste hauling division to SCA Services, Inc., a predecessor of Waste Management Company, Inc.

3. From NRC's inception in 1966 through its sale to SCA in 1973, I served either as President and Chief Executive Officer or Director or both. As a result of my position with NRC, I also have knowledge of many of NRC's customers who hauled their own waste materials to the Landfill. Both in this capacity as well as my employment with Levin & Sons, Inc. (a competitor of San-A-Tainer), where I called upon and became familiar with many of San-A-Tainer's customers, I also have knowledge of many of San-A-Tainer's customers and the nature of their waste materials that were hauled to the Landfill.

4. Since July 6, 1987, I have been employed by OmniSource Corporation, Fort Wayne, Indiana, as its Vice President.

5. From my former capacities as Vice President of Levin & Sons, Inc., and as President of NRC, I have personal knowledge of the waste materials generated and disposed of at the Landfill by the customers described herein.

6. Attached as Exhibit A is a list that was generated by Levin & Sons, Inc., at the time of the sale of its waste hauling division in 1981 to SCA. This list contains names of

entities ("Generators") which generated waste materials that were transported for disposal at the Landfill from 1966 through 1976 (when Affiant understands the Landfill to have been closed by SCA). The list provides the following information for each entity: Company name and billing address.

7. I have reviewed the Levin & Sons, Inc. list (Exhibit A), and, based upon my personal recollection and review of this list, I provide the names and plant locations of these Generators and describe some of the typical waste materials regularly placed from time to time in these Generator's containers and transported to the Landfill for disposal.

B.

Landfill Customers and Description
of Waste Materials

The following is a list of customers and a description of waste materials disposed of at the Landfill:

8. ACME HEAT TREATING COMPANY disposed of solid heat treating waste products, including metallic flakes and powders of non-ferrous or ferrous composition (depending upon the nature of the metallic parts being processed through the system); metallic scale, shovelings, and sweepings; industrial sweepings and shovelings from plant maintenance and clean-up, including oily "floor-dri" and lubricants; and containers and

packages of janitorial, cleaning, and maintenance materials, chemicals, and detergents, or their residues.

9. AMERICAN TOOL COMPANY disposed of metallic grindings and sweepings of varying content (depending upon the metals being machined); industrial sweepings containing oils, lubricants, and coolants, including their packaging, containers and residues therein; and industrial sweepings and shovelings from plant maintenance and clean-up, including oily "floor-dri" and lubricants; and containers and packages of janitorial, cleaning, and maintenance materials, chemicals, and detergents, or their residues.

10. AYR-WAY STORES NORTH and AYR-WAY STORES SOUTH, disposed of waste materials generated by their automotive, paint and hardware, household cleaning and gardening departments. They also disposed of automobile batteries, cans of damaged or non-saleable paint, enamels, thinners, antifreeze, chemical cleaners, drain openers, and garden chemicals and pesticides; and containers, with varying contents and/or residues, containing commercial maintenance and janitorial chemicals, floor strippers, waxes, disinfectants, and detergents.

11. CENTRAL FOUNDRY disposed of various, mainly ferrous, metallic casting and foundry wastes and by-products, including slag and sand containing metallic particles and products; industrial sweepings and shovelings from plant maintenance and

clean-up, including lubricants; and containers and packages of janitorial, cleaning, and maintenance materials and chemicals or their residues.

12. CHRYSLER CORPORATION (Amplex Division in Van Wert, Ohio) disposed of powdered metal residues and paint wastes, including residues associated with the production of finished "painted" and colored metal products; and containers, with varying contents and/or residues, containing commercial maintenance and janitorial chemicals, floor strippers, waxes, disinfectants, and detergents.

13. CONSOLIDATED RAIL CORPORATION ("Conrail") operated rail car clean out and repair centers in Fort Wayne, at two major locations:

(a) A clean out facility at 2010 Winter Street, in which miscellaneous customer rail car debris, including substantial quantities of oily and metallic dirt and debris, was routinely cleaned out of the rail cars and placed into the containers on site, and at which facility, additionally, Conrail conducted a rail car repair operation, producing machine shop metallic grindings and sweepings, metallic welding and other slags, containers, with residual paints, enamels, thinners, chemical cleaners and detergents, and related chemicals used in the cleaning and reconditioning operations, and

(b) A major railroad car repair facility at 2434 Wayne Trace, producing the same waste materials disposed of by the Winter Street facility, but differing in that the volume at the Wayne Trace facility was substantially greater.

14. DANA CORPORATION operated a primary manufacturing facility located at 2100 West State Boulevard, which disposed of large quantities of manufacturing and machine grindings, sweepings, and sludges, including numerous barrels containing the same; containers with residual paints, thinners, and related chemicals; industrial sweepings and shovelings from plant maintenance and clean-up, including oily "floor-dri" and machine lubricants; and janitorial, cleaning, and maintenance chemicals, epoxies, floor strippers, waxes, and detergents.

15. WEATHERHEAD CORPORATION operated two (2) separate facilities, which disposed of waste materials at the Landfill. These consisted of:

(a) A manufacturing facility located in Syracuse, Indiana, which disposed of waste materials consisting of manufacturing and machine grindings, sweepings and sludges, including barrels of chemical wastes and sludges from its regular sludge pit clean-up; containers with residual paints, thinners, and similar substances; industrial sweepings and shovelings from plant maintenance and clean-up, including oily "floor-dri" and machine lubricants; and janitorial, cleaning, and maintenance chemicals, epoxies, floor strippers, waxes, and detergents.

(b) A distribution warehouse located at 3434 Adams Center Road, which disposed of various containers, with various containers with residual contents and/or residues, from commercial maintenance and janitorial materials and supplies, including chemicals, floor strippers, waxes, disinfectants, and detergents.

16. DIETRICH ACOUSTIC disposed of construction demolition and job waste from its acoustical and related contracting and sound control activities, including ceiling tile, asbestos, paints, thinners, and various old construction debris containing similar materials.

17. BUD EVERS AUTO COMPANY disposed of cans and containers with residual paints, enamels, and thinners from its primary auto and truck painting business; and containers and packages of janitorial, cleaning, and maintenance materials, chemicals, and detergents, or their residues.

18. FAMILY MUFFLER SHOPS OF FORT WAYNE disposed of scrap and discarded metallics, including brake linings with asbestos, old automobile mufflers containing lead residues from accumulated gasoline emissions; welding residues; plant clean-up and maintenance residues; and containers and packages of cleaning and maintenance chemicals and supplies.

19. FLEET SERVICE disposed of lubricants, oily materials, chemical washes, truck crankcase drainings with metallics,

metallic grindings, and related by-products from its major truck repair facility; paints, enamels, thinners, and related by-products from its truck painting and refinishing operations; insulation materials and asbestos from truck refrigeration enclosures, and freon from refrigeration units; rubber truck tire grindings and similar products from its tire recapping operations; industrial sweepings and shovelings from plant maintenance and clean-up, including oily "floor-dri" and lubricants; and containers and packages of janitorial, cleaning, and maintenance materials, chemicals, and detergents, or their residues.

20. FORT WAYNE FOUNDRY CORPORATION disposed of various, mainly non-ferrous, metallic casting and foundry wastes and products thereof, including slag and sand containing metallic particles and products; industrial sweepings and shovelings from plant maintenance and clean-up, including lubricants; and containers and packages of janitorial, cleaning, and maintenance materials and chemicals or their residues.

21. FURROW BUILDING MATERIALS, through two (2) separate Fort Wayne facilities, disposed of containers, with damaged or otherwise non-saleable paints, thinners, caulks, asphalt products, for roofing and paving and sealing applications; and containers containing residues and/or partial contents of janitorial, cleaning, and maintenance chemicals and supplies.

22. GENERAL ELECTRIC COMPANY, through two (2) of its Fort Wayne, Indiana, manufacturing facilities, disposed of the following waste materials:

(a) From its manufacturing facility located on Taylor Street in Fort Wayne, disposed of chemical wastes, lubricants, paints, and enamels from its wire drawing mill and operations, in large quantities; oily and chemical sludges; metallic grindings and sweepings, including industrial sweepings and shovelings from plant maintenance and clean-up, oily "floor-dri" and lubricants; and containers and packages of janitorial, cleaning, and maintenance materials and chemicals, or their residues.

(b) Through its Broadway Street facility disposed of the same types of wastes generated by the Taylor Street facility, with the exception of waste products particularly associated with the wire drawing activities, but including all of the residue and wastes from its heavy motor manufacturing operations, as enumerated above.

23. B. F. GOODRICH COMPANY disposed of drums and containers with chemicals and residues from its tire manufacturing operations in Woodburn, Indiana; carbon black powders and residues; oily materials and lubricants; industrial sweepings and shovelings from plant maintenance and clean-up; and containers and packages of janitorial, cleaning, and maintenance materials and chemicals, or their residues.

24. HARDWARE WHOLESALERS, INC., disposed of cans and containers, primarily from its automotive supply, household and related commercial product lines, and primarily from the disposition of damaged or otherwise non-saleable items, chemicals, paints, thinners, lacquers and enamels, batteries, pesticides, drain cleaner, garden chemicals, detergents, and the like; and containers and packages of janitorial, cleaning, and maintenance materials, floor strippers, waxes, and detergents, or their residues, from the maintenance of its own distribution warehouse facilities and offices.

25. HASSAN BARREL COMPANY conducted a drum, barrel, and other container cleaning and recycling operation, and disposed of damaged or unusable drums, containers, and lids with residual chemicals, paints, and other product contents; containers with residual cleaners, caustics, rinses, and by-products from the cleaning process; and its own plant maintenance and clean-up material and fluids, including janitorial fluids and detergents.

26. INTERNATIONAL HARVESTER COMPANY, through four (4) separate Fort Wayne, Indiana, manufacturing or operational facilities, disposed of the following waste materials:

(a) From its Meyer Road facility (P. O. Box 1109) in Fort Wayne, blueprint chemicals and developers, inks, and coated papers from its truck engineering and design activities involving hundreds of drafting stations; and containers with

commercial maintenance and janitorial materials and supplies, including cleaning chemicals, floor strippers, waxes, disinfectants, and detergents.

(b) From its Parts Distribution warehouse and Center, styrofoam packaging products and chemicals and containers with residual chemicals and component ingredients used by Harvester to actually pour, formulate and custom fit styrofoam inner packaging for shipment of their parts; and containers with commercial maintenance and janitorial materials and supplies, including cleaning chemicals, floor strippers, waxes, disinfectants, and detergents.

(c) From its principal Fort Wayne Works and truck manufacturing facility, solid heat treating waste products, including metallic flakes and powders of both non-ferrous and ferrous composition; manufacturing and machine grindings, sweepings, and metallics, mixed with oil and/or chemical lubricants; drums and barrels of oily and chemical sludges with by-products of manufacturing such as grindings and other metallics; containers with residual paint, enamels, and thinners from its truck painting activities; and industrial sweepings and shovelings from plant maintenance and clean-up, including oily "floor-dri" and machine lubricants; and containers with residual commercial maintenance and janitorial materials and supplies, including detergents, chemicals, disinfectants, waxes, epoxies, and the like, in large volume.

(d) From its Warranty Center at 3033 Wayne Trace in Fort Wayne, styrofoam packaging materials; cleaning chemicals and products; and janitorial, cleaning and maintenance chemicals, epoxies, floor strippers, waxes, and detergents.

27. KENTUCKY DECORATIVE PRODUCTS in Spencerville, Ohio, disposed of containers with chemicals and residual chemical products relating to its process of etching and decorating manufactured parts and products, including residual sludges relating to those processes.

28. LAKE END SALES disposed of various cans, containers, and other products, primarily involving damaged or non-saleable household, automotive, and/or commercial paints, enamels, thinners, anti-freezes, chemical cleaners, pesticides, gardening chemicals, drain openers, and the like; and containers with residual commercial maintenance and janitorial chemicals, floor strippers, waxes, disinfectants, and detergents.

29. LYDALL, INC.'s, Flashfold Division, disposed of solvents, inks, machinery maintenance, lubricants and oils, and plant maintenance and clean-up residues, including floor sweepings containing the foregoing products from its box manufacturing operations; and janitorial, cleaning, and maintenance chemicals, floor strippers, detergents, and disinfectants from its own plant and office maintenance.

30. The National Seal Division of FEDERAL MOGUL, in Van Wert, Ohio, disposed of machine stampings and by-products from its manufacturing of rubber seals; chemicals relating to the rubber manufacturing process, and residues of such chemicals; paints and thinners, and both paint and chemical residues mixed with rubber waste materials; and commercial maintenance and janitorial materials and supplies from its own plant and office maintenance, including chemicals, floor strippers, waxes, disinfectants, and detergents.

31. NORTHERN INDIANA PUBLIC SERVICE COMPANY (NIPSCO) disposed of transformers and transformer oils, truck maintenance lubricants, oils, paints, enamels, and thinners; sweepings and shovelings from its own plant maintenance and clean-up, including oily "floor-dri" and machine lubricants; and janitorial, cleaning, and maintenance chemicals, strippers, waxes, disinfectants, and detergents.

32. OHIO DECORATIVE PRODUCTS, Spencerville, Ohio, disposed of containers with chemicals and residual chemical products relating to its process of etching and decorating manufactured parts and products, including residual sludges relating to those processes.

33. PARKVIEW MEMORIAL HOSPITAL disposed of all manner of medical wastes, including containers, gauze and cotton products and/or similar materials containing germicides, iodines, surgical scrubs, disinfectants, and sterilants; medical wastes

and organic effluents; bottles and vials with laboratory chemicals and test products; used syringes with medicinal and/or blood residues; and containers with partial or residual contents of hospital disinfectants, maintenance and cleaning supplies, floor strippers, waxes, detergents, aerosols, and the like.

34. PHELPS DODGE COPPER PRODUCTS COMPANY disposed of chemical wastes, lubricants, paints, and enamels from its wire drawing mill and operations, in large quantities; oily and chemical sludges; metallic grindings and sweepings from its plant maintenance and clean-up activities, including oily "floor-dri" and machine lubricants; and janitorial, cleaning, and maintenance chemicals, epoxies, detergents, floor strippers, waxers, and related chemicals from its plant and office general maintenance.

35. 7-UP BOTTLING COMPANY disposed of disinfectants, sterilizing agents, and containers with residual chemicals and anti-bacterial agents relating to its operation and maintenance of its soft drink bottling operations; and janitorial, cleaning, and maintenance chemicals and supplies, from its own plant maintenance, including floor strippers, epoxies, detergents, cleaning chemicals, waxes, and the like.

36. WAYNE HOME EQUIPMENT COMPANY disposed of machinery lubricants and oils, manufacturing sludges, paints, enamels, and thinners, relating to its manufacture of such home

equipment as pumps, blowers, and fan motors; and industrial sweepings and shovelings from its own plant maintenance and clean-up, including oily "floor-dri" and machine lubricants, and janitorial, cleaning, and maintenance chemicals, epoxies, floor strippers, detergents, disinfectants, and waxes from its plant and office maintenance.

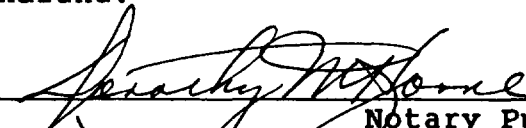

FURTHER Affiant sayeth not.
